<script>	JavaScript

5. Website Sections

1) Navigation Bar

Contains:

- Website logo (AniVerse)
- Home
- Popular
- New
- Movies
- Search box
- Profile avatar

Purpose:

- Easy navigation between sections
 - Quick search access
 - Profile options
-

2) Hero Section

Displays:

- Large anime banner
- Anime title
- Description
- Watch Now button
- More Info button
- Previous/Next slider buttons

Purpose:

- Highlight featured anime
 - Attract user attention
-

3) Trending Now Section

Displays:

- New anime cards
- Anime image
- Title
- Episode details
- Watch button
- Details button
- Watchlist button

Purpose:

- Show latest trending anime
-

4) Popular Anime Section

Displays:

- Famous anime series
- Hover effects
- Quick access buttons

Purpose:

- Show highly popular anime
-

5) Anime Movies Section

Displays:

- Anime movie cards
- Movie labels
- Hover controls

Purpose:

- Display anime movies separately
-

6) Watchlist Page

Contains:

- Saved anime
- Anime image
- Title
- Info
- Close button

Purpose:

- Save anime for later viewing
-

7) Settings Modal

Contains:

- Dark mode
- Continue watching
- Video quality
- Subtitles
- Language
- Watch history
- Privacy
- Notifications

Purpose:

- Customize website experience
-

8) Anime Details Modal

Displays:

- Anime image
- Title
- Description
- Close button

Purpose:

- View anime details
-

9) Footer

Contains:

- Copyright text
- Designer name

Purpose:

- Professional ending
-

6. CSS Used

CSS improves design and appearance.

Important Selectors

Selector	Use
